RENEWABLE SOLUTIONS (LEVEL 3)

Advanced (Business Application)

Procurement kaise hota hai?

Solar procurement typically involves:

- Sourcing from MNRE-compliant and ALMM-listed OEMs
- Matching customer technical specifications with OEM offerings
- Coordinating between OEMs, logistics partners, and site teams
- Managing documentation and milestone-based deliveries

Certification and Approvals

Common certifications referenced:

- ALMM approval
- BIS certification
- IEC standards (61215, 61730, 62804, 61853-1)
- ISO certifications (9001, 14001, 45001)
- Salt mist, ammonia, and environmental testing

Quality Inspection

Material kaise check hota hai?

Typical quality checks include:

- Visual inspection of modules
- EL testing and sun simulator results (OEM level)
- Packaging and transport damage checks
- Documentation and test certificates

FYI

- *OEM certifications and approvals are mandatory*
- *Brand flexibility exists only within approved specifications*

FACT

We have successfully executed an order worth INR 16 crore for Cosine Power Private Limited!
