HEADSUP B2B

CRASH BARRIERS (LEVEL 1)

Use kahan hota hai?

Highways and expressways

Curves and sharp bends

Bridges and flyovers

Railway track boundary

Mountain and ghat roads

Kaunse Products?

W-Beam Barrier

Thrie Beam Barrier

MOQ : Minimum 1 km (1000 m)

Brand Kaunsa?

HI-TECH

UTKARSH
Life demands. We deliver.

TRADE Jindal MARK
JINDAL (INDIA) LIMITED

SHYAM METALICS
ORE TO METAL

HEADSUP B2B

CRASH BARRIERS (LEVEL 2)

Pricing aur **Quotation** Samajhne Ke Liye Zaroori Basics

Quotation Basis - Rate kis unit mein hota hai?

- Crash barrier quotation mostly **per metre** mein hota hai
- Industry mein per metre rate hi preferred aur accepted format hai
- Per kg ya per set pricing internally calculation ke liye use hoti hai, customer-facing nahi

Road contractors *se direct inquiry / BOQ ke through requirement aati hai*

FUN FACT

Headsup B2B ka biggest order : 16 CR material (Single order : delivery)

Delivery and Transport – Pricing par kya impact hota hai?

- Crash barrier rate generally **freight-inclusive** hota hai
- **Distance**, **site accessibility**, and **unloading condition** cost affect karte hain
- Remote ya difficult locations mein transport cost significant hoti hai

Price Decide karte waqt kaun se parameters matter karte hain?

Crash barrier ka final price in factors par depend karta hai:

- **Beam type** – W-beam ya Thrie-beam
- **Crash Barrier type** - Crash tested / Conventional
- **Material weight** – Total kg per metre
- **Zinc coating (GSM**) – Higher GSM = higher cost
- **Post spacing** – 2 m / 4 m spacing
- **Bolt** and **fastener size**
- **Project location** – Pincode impacts freight and logistics

HEADSUP B2B

CRASH BARRIERS (LEVEL 3)

Advanced (Business Application)

Procurement kaise hota hai?

- Crash Barriers mostly **approved contractor sources** se procure hote hain.
- Material chahe kisi bhi manufacturer se aaye, approved specification meet karna compulsory hai.

Focus area :

- Steel grade
- Coating uniformity
- Dimensional accuracy
- Alignment and finish

📌 *Currently, sourcing approved manufacturers **(for example, Jindal)** se hoti hai*

Certification and Approvals

- **IS and MoRTH IRC** compliance source approval ke time verify hota hai
- **NHAI** ya **Highway Authority Inspection ke taraf se consultants** acceptance karti hai
- Certification ensures material safety, durability, and legal compliance

Quality Inspection – Material kaise check hota hai?

Crash barrier supply se pehle aur site par ye checks hote hain:

- **Zinc coating test** – GSM compliance
- **Thickness check** – Beam and post thickness
- **Per metre weight** – Specification match
- **Galvanising quality test** – Uniform coating
- **Visual inspection** – Finish, bends, damage
