HEADSUP B2B

CRASH BARRIERS (LEVEL 2)

Pricing aur **Quotation** Samajhne Ke Liye Zaroori Basics

Quotation Basis - Rate kis unit mein hota hai?

- Crash barrier quotation mostly **per metre** mein hota hai
- Industry mein per metre rate hi preferred aur accepted format hai
- Per kg ya per set pricing internally calculation ke liye use hoti hai, customer-facing nahi

Road contractors *se direct inquiry / BOQ ke through requirement aati hai*

FUN FACT

Headsup B2B ka biggest order : 16 CR material (Single order : delivery)

Delivery and Transport – Pricing par kya impact hota hai?

- Crash barrier rate generally **freight-inclusive** hota hai
- **Distance**, **site accessibility**, and **unloading condition** cost affect karte hain
- Remote ya difficult locations mein transport cost significant hoti hai

Price Decide karte waqt kaun se parameters matter karte hain?

Crash barrier ka final price in factors par depend karta hai:

- **Beam type** – W-beam ya Thrie-beam
- **Crash Barrier type** - Crash tested / Conventional
- **Material weight** – Total kg per metre
- **Zinc coating (GSM**) – Higher GSM = higher cost
- **Post spacing** – 2 m / 4 m spacing
- **Bolt** and **fastener size**
- **Project location** – Pincode impacts freight and logistics
