HEADSUP B2B

CRASH BARRIERS (LEVEL 3)

Advanced (Business Application)

Procurement kaise hota hai?

- Crash Barriers mostly **approved contractor sources** se procure hote hain.
- Material chahe kisi bhi manufacturer se aaye, approved specification meet karna compulsory hai.

Focus area :

- Steel grade
- Coating uniformity
- Dimensional accuracy
- Alignment and finish

📌 *Currently, sourcing approved manufacturers **(for example, Jindal)** se hoti hai*

Certification and Approvals

- **IS and MoRTH IRC** compliance source approval ke time verify hota hai
- **NHAI** ya **Highway Authority Inspection ke taraf se consultants** acceptance karti hai
- Certification ensures material safety, durability, and legal compliance

Quality Inspection – Material kaise check hota hai?

Crash barrier supply se pehle aur site par ye checks hote hain:

- **Zinc coating test** – GSM compliance
- **Thickness check** – Beam and post thickness
- **Per metre weight** – Specification match
- **Galvanising quality test** – Uniform coating
- **Visual inspection** – Finish, bends, damage
