HEADSUP B2B

# RENEWABLE SOLUTIONS (LEVEL 1)

## Use kahan hota hai?

Institutional buildings (schools, hospitals, government buildings)

Industrial plants and factories

Ground-mounted solar projects

Commercial Rooftops

## Why Renewable?

Bijli ka kharcha kaafi kam ho jaata hai

Environment ke liye sahi decision hota hai

25–30 saal tak stable power milti hai

System reliable hota hai, maintenance bahut kam

## Kaunse Products?

Solar Panels, cells & mounting solutions

Solar charge controllers

Solar Water Systems

Solar lighting solutions

Solar Inverters and power units

Solar Accessories

HEADSUP B2B

# RENEWABLE SOLUTIONS (LEVEL 1.1)

## Solar Panel Basics

Common **technologies** :

- Mono PERC
- TOPCon (N-Type)
- Bifacial modules
- Half-cut cell technology

**Key attributes** to recognise :

- Wattage range (approx. 415 Wp to 600 Wp depending on series)
- Cell configuration (120, 132, 144 cells)
- Performance in low-light and high-temperature conditions
- Warranty structure (product warranty and performance warranty)

## Headsup B2B value in commercials

Headsup B2B supports customers by:

- Demand consolidation across sites
- Strategic sourcing from certified OEMs
- Centralised PO and order management
- Real-time tracking and delivery visibility
- Post-delivery and after-sales coordination

## Brand Kaunsa?

ACME | SOLAR

First Solar®

NOVA SYS®
Every day is a SUN day

HEADSUP B2B

# RENEWABLE SOLUTIONS (LEVEL 2)

## **Pricing** aur **Quotation** Samajhne Ke Liye Zaroori Basics

### Quotation Basis - Rate kis unit mein hota hai?

Solar pricing is usually structured around:

- Per watt (₹/Wp) pricing for panels
- System-level pricing (₹ per kW or MW)

Separate pricing for:
Panels , Inverters, Structures, BOS

Customer-facing discussions focus on:

- Total system cost
- Delivered cost to site
- Compliance and certifications

### Price decide karte waqt kaunse parameters matter karte hain?

Key pricing drivers include:

- Module technology (Mono PERC vs TOPCon vs Bifacial)
- Wattage and efficiency
- ALMM and MNRE compliance status
- Quantity and project scale
- Delivery location and logistics complexity
- Warranty terms and OEM credibility

### Important information to check for

- Total project size
- Delivery Timeline and Logistics
- Location for delivery

### Delivery and logistics – pricing par kya impact hota hai?

- **Price mein freight included bhi ho sakta hai ya alag se lag sakta hai**, deal ke structure par depend karta hai
- **Site ka location aur access** (remote area, narrow road, crane requirement) logistics cost ko impact karta hai
- **Unloading conditions** (manual vs crane, floor level, storage space) se cost badh ya kam ho sakti hai
- **Agar multiple sites hain**, toh delivery planning, coordination aur tracking required hoti hai

**All our partners are MNRE Compliant, ensuring access to fully certified solar infrastructure. We facilitate post-commissioning compliance through vetted, service ready vendors**

HEADSUP B2B

# RENEWABLE SOLUTIONS (LEVEL 3)

## **Advanced** (Business Application)

### Procurement kaise hota hai?

Solar procurement typically involves:

- Sourcing from MNRE-compliant and ALMM-listed OEMs
- Matching customer technical specifications with OEM offerings
- Coordinating between OEMs, logistics partners, and site teams
- Managing documentation and milestone-based deliveries

### Certification and Approvals

Common certifications referenced:

- ALMM approval
- BIS certification
- IEC standards (61215, 61730, 62804, 61853-1)
- ISO certifications (9001, 14001, 45001)
- Salt mist, ammonia, and environmental testing

### Quality Inspection

Material kaise check hota hai?

Typical quality checks include:

- Visual inspection of modules
- EL testing and sun simulator results (OEM level)
- Packaging and transport damage checks
- Documentation and test certificates

FYI

- *OEM certifications and approvals are mandatory*
- *Brand flexibility exists only within approved specifications*

FACT

***We have successfully executed an order worth INR 16 crore for Cosine Power Private Limited!***

### Our Clients

SHIVA ENTERPRISES | UTL SOLAR | AM Enterprises
